

Hurricane Preparedness

Walter S. Maestri, Ph.D., is the Director of Training for DRC Emergency Services (2006-ytd), and former director of emergency management for Jefferson Parish (1996-2006).

In this special presentation for the ABC New Orleans/Bayou Chapter, he will review the normal preparations that the metro area parishes ask each citizen and business to undertake as, first, hurricane season, and then, an actual storm approaches.

Dr. Maestri will:

- discuss a list of hurricane preparation suggestions developed for businesses
- review the specific recommendations developed for the construction industry by FEMA
- share the lessons learned from H.Katrina and give suggestions on dealing with catastrophic storms
