ABC's Insurance program was formed in 1957 to help ABC contractors attract and retain skilled workers through competitive employee benefits plans. In today's world, what most members want and need is an organization that specifically focuses on their needs.

We only work with ABC member firms so we know what firms in construction or construction related businesses face on a daily basis. Whether you are just starting a group health program or have had one in place for awhile we can work with you as your benefit needs grow.

ABC Insurance offers Dental, Vision, Life, and Disability plans available only to member firms. These plans feature negotiated rates and designs for the benefit of the member. We also work with all major health providers both locally and nationally to find the best plan at the best price that suits the needs of the firm.

When placing their health benefits through the program a member can also receive a complimentary Employee Handbook specifically written for the construction industry, a free Section 125 Premium Only plan and custom brochures outlining their benefits for employees.
